

a Major and minor semi-axes

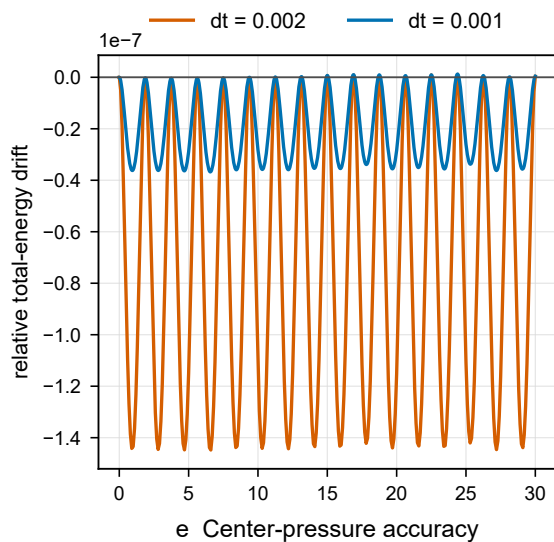

--- Exact major — dt = 0.002 major — dt = 0.001 major
 Exact minor - - - dt = 0.002 minor - - - dt = 0.001 minor

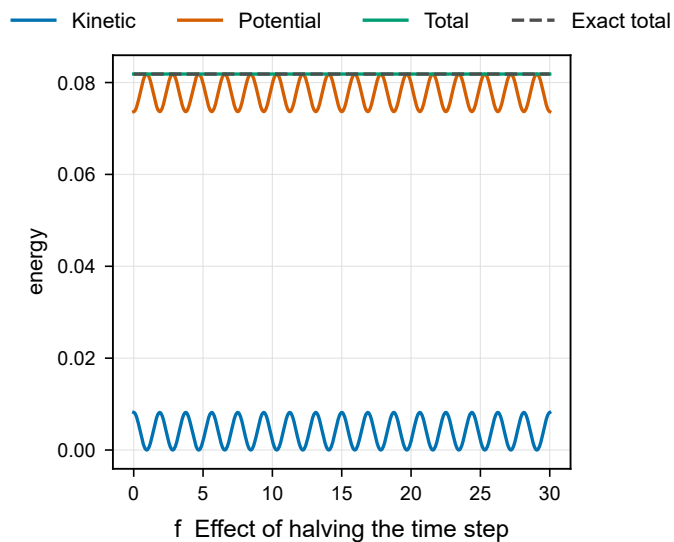

b Accumulated phase error

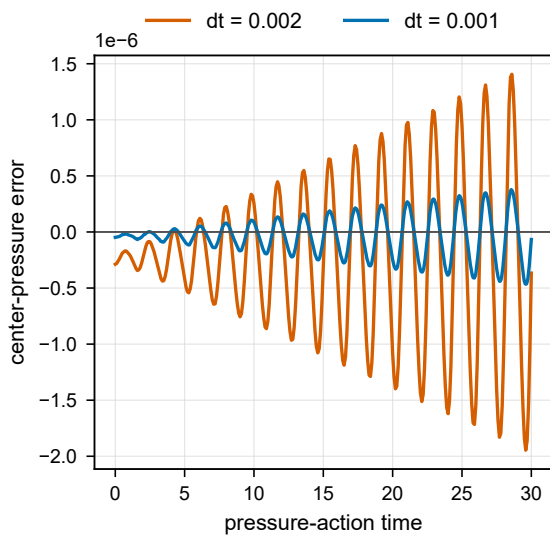

c Mechanical-energy behavior

d Conservative energy exchange, dt = 0.001

e Center-pressure accuracy

f Effect of halving the time step
